

WHY SYDNEY?

ISVEE 2024, Sydney Australia

- 
- 1** The local Australian and New Zealand community has a proud history of contribution to veterinary epidemiology & economics, and remains a world leader.
 - 2** Expertise has been applied to eradicate major diseases, remain free of many of the world's worst transboundary diseases, and produce high quality livestock products.
 - 3** The mission of the principal supporter - the Epidemiology Chapter of the Australian and New Zealand College of Veterinary Scientists - is to train veterinary epidemiologists. It has more than 200 active members.
 - 4** Scientific themes will introduce novel and emerging fields, such as the nexus between epidemiology and sociology, artificial intelligence, and data mining.
 - 5** Strong support from veterinary professional associations, our 8 veterinary schools and government and industry partners.
 - 6** Host city is home to the Sydney School of Veterinary Science, the oldest continually operating veterinary school in the region, opening its doors in 1910.
 - 7** Sydney is a world city that offers beautiful cityscapes framed by a world-famous harbour.

Australia provides an exciting opportunity for ISVEE 2024 to make a difference to the global research community.
